Buy This for Good Times

**KEY TAKEAWAYS**

⇒ Market sentiment is skewed with expectations too high.
⇒ Small stocks crushing the big boys; could small cap dividends be a good play?
⇒ This industry’s stocks are on a roll and it is just the beginning.
⇒ With rising interest rates pushed back to 3Q/4Q16, bank stocks’ movement could stall.
⇒ This semi trades less than 8x EPS and when business is strong like today it commands a P/E of 10x-12x

**DON’T FALL FOR THIS TRAP**

Things aren’t what they seem.

Friday’s jobs report was downright terrible, but the sky is not falling. The economy may be improving in certain circles but overall, growth isn’t exactly stellar. The poor jobs report might mean we get a reprieve on a rate hike until after the election. However, it could result in more frequent and sharper increases.

When I lift up the hood on the jobs report, key characteristics point to a stagnant job growth period, which keeps stocks in check; either down or in a narrow range. Here’s why.

Economists were forecasting 150,000 new jobs. Schmucks. I guess they forgot about the 35,000 striking Verizon (NYSE—VZ) workers. It made the number look worse than it actually is. We have also reached a trough in the unemployment rate. It needs time to settle. The rotten retail market is not helping this cause. Moreover, with summer season upon us we may find summer workers (i.e., students) may find difficulty obtaining work.

Let’s not forget what I call the accelerator/capability gap. A lot of openings in tech and high-end (but not management) jobs have not been filled for months as our ever-increasing tech progression has outpaced the capabilities of prospective workers in high tech and related industries. So, no workers to fill those jobs, while the rest of the unemployed are stuck between adding proficiency for new work, or waiting for something in their sweet spot.

For summer, expect low job growth and little stock action.
As Yogi Berra would say, “it’s déjà vu all over again.” The Russell 2000 Index was again the star index last week and there is no indication that aside from some potholes, the road is pretty clear ahead in the near term. I chuckle when I hear market strategists predicting what it will take to get the DJIA to the 20,000 mark, which would be a more than 10% gain. The hell with that. That is an all-time high and then some and would be hard to reach. A 10% gain in the small cap stock index still doesn’t even take it to its 52 week high!

Stock with small, you will have a ball. To be even more specific, semis are in the early part of what feels and smells like one of their patented runs. We kinda felt this way when we published the most recent edition of The 30-30 Report. Two of the three profiled stocks 3 weeks ago are in the semi space and they are up an average of 18% very quickly. Many are long on cash, enjoying increasing margins and still trade at attractive P/E multiples.

It looks like our call on small bank stocks in March may have been premature. Although the lone profile, Bank of California (NASDAQ—BANC—$19.98) is up 25%, if interest rates don’t rise anytime soon, this segment could languish for a few months.
Say What?

Great info, insights, and hard-hitting stories make up this week’s Say What? feature...

*The Wall Street Journal*

I thought this has escalated quickly.

*Marketwatch*

http://www.marketwatch.com/story/this-is-the-surprise-amid-the-stock-market-confusion-2016-06-04

I will let you be the judge of that.

*Bloomberg*

No irony that a company named *Sprint* is going broke “slowly”? Stock has sucked for years.

*The New York Post*

http://nypost.com/2016/06/03/ugly-jobs-report-is-even-worse-than-it-looks/

Ugly...but maybe we should take an alternative posture.

*ZeroHedge*

I have been getting more and more info from abroad than I care to divulge.
**Notable Numbers**

</table>

I wish I could speak with the respondents to these polls/surveys today. My guess is that the news found in Friday’s jobs report would modify these original responses. For both groups to go markedly bullish is a little too much if you ask me. But, then again, I am cautiously optimistic with a touch of Debbie Downer for the near term. It will be interesting to see what happens with big dividend payers over the coming weeks/months. In a rising interest rate environment, big dividend paying stocks tend to experience selling as investors seek a guaranteed return with less principal risk inherent in bonds than equities. If the rate hikes are delayed, perhaps the fact that annual dividend yields for Russell 2000 stocks are up an average of 14% from a year ago, make them attractive today.
**Big Gains Ahead For This Semi Stock**

Our last three stock profiles are up, one more than 20%. Can we strike gold a 4th time? We think so.

**Tower Semiconductor Ltd. (NASDAQ—TSEM—$13.05—NR)** is a global specialty foundry leader. TowerJazz manufactures integrated circuits, offering a broad range of customizable process technologies including: SiGe, BiCMOS, mixed-signal/CMOS, RF CMOS, CMOS image sensor, integrated power management (BCD and 700V), and MEMS. Semi stocks are on the rise and TSEM has joined the party in recent weeks after crushing 1Q16 EPS estimates on a non-GAAP basis.

Wall Street consensus currently forecasts a 28% jump in revenue to the $1.2 billion mark, with EPS of $1.98, which is a big drop in EPS from last year. However, at current levels, the stock trades under 8x this year’s EPS. This is not so unusual during trough periods and during industry spikes, the stock can trade as much as 12x EPS.

![Stock Chart](chart.png)

We target $17, which is a 23% rise and matches the 52-week high. With the recent April book-to-bill posting a 22% rise over March, the wind is at TSEM’s back. Plus, when the stock busts through the 200 DMA of $13.09, it could give the stock a short term boost.
Launched in May 2010, The Goldman Guide is a free weekly publication of Goldman Small Cap Research and is written by Founder Rob Goldman with contributions from the GSCR contributor team. This non-sponsored investment newsletter seeks to provide investors with market, economic, political and equity-specific insights via an action-oriented, straight to the point approach. No companies mentioned in this newsletter are current sponsored research clients of the Company or its parent, unless noted. With some exceptions, all companies or investment ideas mentioned in this publication are publicly traded stocks listed either on the NYSE or the NASDAQ. Goldman Small Cap Research members and contributors’ bios, certifications, and experience can be found on our website: www.goldmanresearch.com.

Disclaimer

This newsletter was prepared for informational purposes only. Goldman Small Cap Research, (a division of Two Triangle Consulting Group, LLC) produces non-sponsored and sponsored (paid) investment research. Goldman Small Cap Research is not affiliated in any way with Goldman Sachs & Co.

The Firm’s non-sponsored research publications category, Select Research, reflects the Firm’s internally generated stock ideas, along with economic, industry and market outlooks. In virtually all cases, stocks mentioned in Select Research offerings are listed on the NYSE or the NASDAQ. Publications in this category include the weekly newsletter The Goldman Guide, Market Monitor blogs, Special Reports, and premium products such as The 30-30 Report. Goldman Small Cap Research analysts are neither long nor short stocks mentioned in this newsletter.

Opportunity Research reports, updates and Microcap Hot Topics articles reflect sponsored (paid) research but can also include non-sponsored microcap research ideas that typically carry greater risks than those stocks covered in Select Research category. It is important to note that while we may track performance separately, we utilize many of the same coverage criteria in determining coverage of all stocks in both research formats. Please view the company’s individual disclosures for each engagement, which can be found in company-specific Opportunity Research reports, updates and articles.
